Daina Workaround Sheet

If you find a glitch, send me a message on Twitter with some details and I'll add it to the list!

Problem	Description	Example	Workaround	Fixed Example
[N]	Daina will not utter [N] on it's own. This includes after being connected to another word to extend an ending consonant.	[N] <u>For extension:</u> Sing - [s I N] [N]	Replace with [n] <u>For extension:</u> Change the latter [N] to [n] and the result will be similar to intended. **OR** Replace the latter [N] with [-]	[n] <u>For extension:</u> [s I N] [n] **OR** [s I N] [-]
[s I]	The [I] will generate two noises. One is closer to [i:], and the other is closer to [e].	Sin / Seen - [s I n] This example features two words, demonstrating the [I] inconsistency.	If an "ih" sound is desired, replace [I] with [e]. Alternatively, if an "ee" sound is desired, replace [I] with [i:].	[s e n] **OR** [s i: n]
[- eI t] from G3 down	The [t] won't be pronounced or will be near inaudible	Fate - [f eI t]	Replace [t] with [th] **OR** Add an [h] or [h\] to preference at the end.	[f eI th] **OR** [f eI t h] **OR** [f eI t h\]
